Subang

As a dedicated and innovative IT professional, I specialize in ERP portal development and have successfully architected and deployed a comprehensive QR code tracking module to enhance operational efficiency in manufacturing. Passionate about translating complex business requirements into intuitive digital solutions, I excel in designing scalable databases and optimizing backend services to support high-volume transactions and seamless user experiences.

Work Experiences

PT. Shimada Karya Indonesia - **Sumedang, Indonesia** Mar 2026 - Present

IT Intern

- Continue developing the company's core ERP portal as part of a development team, expanding existing modules and building new features to support evolving operational needs across divisions.
- Architected and deployed an end-to-end QR code tracking module using Laravel and MySQL, digitizing production workflows and improving item traceability across manufacturing stages.
- Develop a new HRD module covering employee attendance through payroll processing, replacing manual workflows with an integrated, automated system within the ERP.
- Work directly with production and HRD division leads to translate business requirements into functional backend APIs and responsive user interfaces.
- Design MySQL schemas, manage migrations, and optimize SQL queries to handle high-volume QR scanning, attendance records, and ERP data logs.
- Support IT infrastructure operations, including LAN cabling and network setup, IP configuration, new device provisioning, and server migrations to keep systems running reliably for daily operations.

Institut Teknologi Nasional Bandung - **Bandung, Indonesia** Sep 2023 - Feb 2024

Multimedia Engineer Laboratory Assistant

- Collaborate with a team of three other assistants to deliver hands-on instruction in multimedia production. Provide structured lab modules covering Adobe Animate, Adobe Premiere Pro, and Blender.
- Guide students in building an interactive application with Adobe Animate for their first major project. Ensure each project demonstrates solid 2D animation fundamentals and interactive design.
- Mentor students in producing a video of at least 3 minutes with Adobe Premiere Pro for their second major project. Support the integration of green screen footage and 3D objects created in Blender to strengthen the final result.
- Manage and support a class of 42 students, providing individualized attention and feedback. Oversee project reports covering flowcharts, storyboards, and production documentation to ensure students can plan and present their work professionally.

BPJS Kesehatan Kab. Subang - **Subang, Indonesia** Jul 2023 - Sep 2023

Web Developer Intern

- Designed and developed a link management platform to centralize, organize, and share internal links and resources, replacing scattered and manually shared links.
- Built a responsive user interface with React.js and Tailwind CSS, focusing on clean navigation and ease of use for non-technical staff.
- Implemented backend services using Supabase, including database design, authentication, and data management for storing and retrieving links.
- Collaborated with office staff to gather requirements, test features, and refine the system based on day-to-day workflow needs.
- Delivered the project as part of a mandatory practical work program (Kerja Praktik), covering the full development cycle from planning and design to deployment.

Institut Teknologi Nasional Bandung - **Bandung, Indonesia** Feb 2023 - Jun 2023

Object Oriented Programming Laboratory Assistant

- Collaborate with a team of three other assistants. Focus on delivering comprehensive instruction in Object-Oriented Programming (OOP) principles.
- Cover essential OOP concepts, including classes and objects, encapsulation, inheritance, and more. Ensure students have a strong foundation in OOP principles, which are fundamental to software development.
- Utilize the NetBeans for teaching and practical exercises. Teach programming using the Java programming language.
- Manage and support a class size of over 40 students in the Object-Oriented Programming course. Provide individualized attention and assistance to ensure all students have the opportunity to excel in the subject matter.

Education Level

Institut Teknologi Nasional - **Bandung, Indonesia** Sep 2020 - Oct 2026

Bachelor of Informatics, 3.68/4.00

Organisational Experience

Himpunan Mahasiswa Informatika - **Bandung, Indonesia** Sep 2023 - Sep 2024

Head of Rumah Tangga Himpunan

- Led the Rumah Tangga Himpunan team in managing household operations, ensuring efficient and timely execution of all tasks
- Spearheaded the planning and execution of organizational operations and logistics for events and internal activities, enhancing overall efficiency

Himpunan Mahasiswa Informatika Sep 2020 - Sep 2024

Staff

- Become a staff who run various work program from HMIF Itenas
- Managed logistics as the Head of Logistics for the Pengabdian Pada Masyarakat (P2M) initiative in Kp. Pasir Junghuhn, Pangalengan, Bandung, ensuring successful project delivery and community satisfaction.

Skills, Achievements & Other Experience

- **Programming Language**: PHP, JavaScript, Python
- **Web Development**: React.js, Laravel, TailwindCSS ,HTML, CSS
- **Database**: MySQL, Supabase
- **Tools**: Visual Studio Code, Git, GitHub, Microsoft Excel
- **Language**: Bahasa Indonesia (Native), Bahasa Inggris (Intermediate)
